

ORCID Integration ins FIS PURE (Elsevier)

2019 Austrian Consortium Workshop
13. Juni 2019 – TU Wien

Christian Hasenhüttl und Robert Gregoritsch

WO AUS FORSCHUNG ZUKUNFT WIRD

Universitätsbibliothek und Archiv

Integrationsablauf

- Konsortiumsbeitritt & Zahlungsabwicklung
- Erstellung ‚Main relationship contact‘ (ORCID)
- Organisationserstellung über ‚Member Tools‘(ORCID)
- APP Registrierung und PIN Code über technical contact (ORCID)
- Passpack Email f. client secrets (ORCID)
- Integration in PURE (API u. Importquellen)
- Information der WissenschaftlerInnen innerhalb der Universität

Pure Export

[Export to ORCID](#)

Enable export of Pure content to ORCID

Select whether or not to allow Personal Users to choose to export Pure content to to ORCID. Content that will be synchronised includes Research outputs (Published/ePub ahead of print + Publicly visible + workflow step as configured below), Affiliation details (Institution + country + city, as per configuration below), Other IDs (Scopus author ID, Researcher ID, Digital Author ID), and the Pure Portal URL (if selected below).

[Export content to ORCID](#)

On

ORCID credentials

By providing the institution client credentials for the ORCID member API, it will be possible for users to link their profile in Pure with their ORCID ID.

ORCID client ID

APP-6FSTTCWOI90XRH3L

The institution-specific identification ID provided by ORCID upon registering the institution.

ORCID client secret

.....

The institution-specific secret key provided by ORCID upon registering the institution.

Sandbox mode

Enabling the Sandbox mode will result in Pure interacting with ORCID's sandbox, rather than the live environment. For use during ORCID integration testing.

[Toggle sandbox mode](#)

Off

Affiliations

The export to ORCID will include basic institutional information for each researcher.

Send Pure Portal URLs to ORCID

☒ On

Include individuals' and outputs' Pure Portal URLs in the export to ORCID. When enabled, the individuals' and outputs' Pure Portal URLs will be visible as hyperlinks in the individuals' ORCID page, thereby giving ORCID readers the opportunity to navigate to the Pure Portal for further information on the researcher and the output. Disable if the Pure Portal is not available from the internet.

Effective workflow step

For validation ▼

Research output prior to this workflow step are not sent to ORCID.

Root organisation *

Montanuniversitaet Leoben (000)

Organisational unit: University

Aufgetretene Problem

- Beim Erhalt der ‚client secrets‘ über Passpack, muss das Secret über den integrierten ‚copy to clipboard‘ button kopiert werden – manuelle Kopie erzeugte Fehler

The screenshot shows the 'Entry Details' form for 'Montanuniversität Leoben'. The form has several input fields: Name (Montanuniversität Leoben), User ID, Password (with a 'hide' button), Link, Email, and Tags. A 'Notes' section on the right contains the following text: 'Client ID: APP-6FSTTCWOI90XRH3L' and 'Client secret: [redacted]'. A green arrow points to the 'copy to clipboard' icon in the notes section. The form also has a 'Close' button at the bottom right.

Unklarheiten bei den Redirect URLs

- Erstregistrierter URI <https://pure.unileoben.ac.at/portal/de/> nicht funktional
Umstellung auf <https://pure.unileoben.ac.at/admin> notwendig

Pure Benutzer

Von der persönlichen Visitenkarte in Pure werden die WissenschaftlerInnen direkt zu ORCID verlinkt.

Seit Umstieg auf neue Version kann ORCID auch als Importquelle in Pure genutzt werden.

The screenshot shows the 'Person' editor interface in the Pure system. The user is Christian Hasenhüttl (ID: 620310). The 'Persönliche Identifizierung' section includes fields for Vorname(n) (Christian), Nachname (Hasenhüttl), Geschlecht (Männlich), Geburtsdatum (redacted), Nationalität (Österreich), and Titel (Dr. phil.). There is a note about language-specific fields. The 'ORCID' section shows a linked ORCID iD (orcid.org/0000-0001-6779-7243) and an option to export content. The 'Curriculum und Forschungsbeschreibung' section shows a list of positions, including 'Universitätsbibliothek und Archiv' from 1/01/04 to 28/02/14.

The screenshot shows the 'Choose submission' interface. On the left is a sidebar with options: Submission guide, Research output (selected), Activity, Prize, Dataset, Facility/Equipment, and Curriculum Vitae. The main area displays three submission sources: ORCID, Web of Science, and Scopus. The ORCID section explains that ORCID is a nonprofit organization helping create a world where research contributions are uniquely identified and connected. The Web of Science section mentions that the 'Web of Science (lite)' version contains only a limited number of fields. The Scopus section states that Scopus covers over 22,000 titles from more than 5,000 international publishers. The arXiv.org section is partially visible at the bottom right.

Danke für die Aufmerksamkeit
