ORCID US Community Showcase #4

Sept. 24, 2019

Presented by the ORCID US Community, supported by LYRASIS, in partnership with ORCID, University of Illinois at Urbana-Champaign, Florida State University, and Mississippi State University

LYRASIS

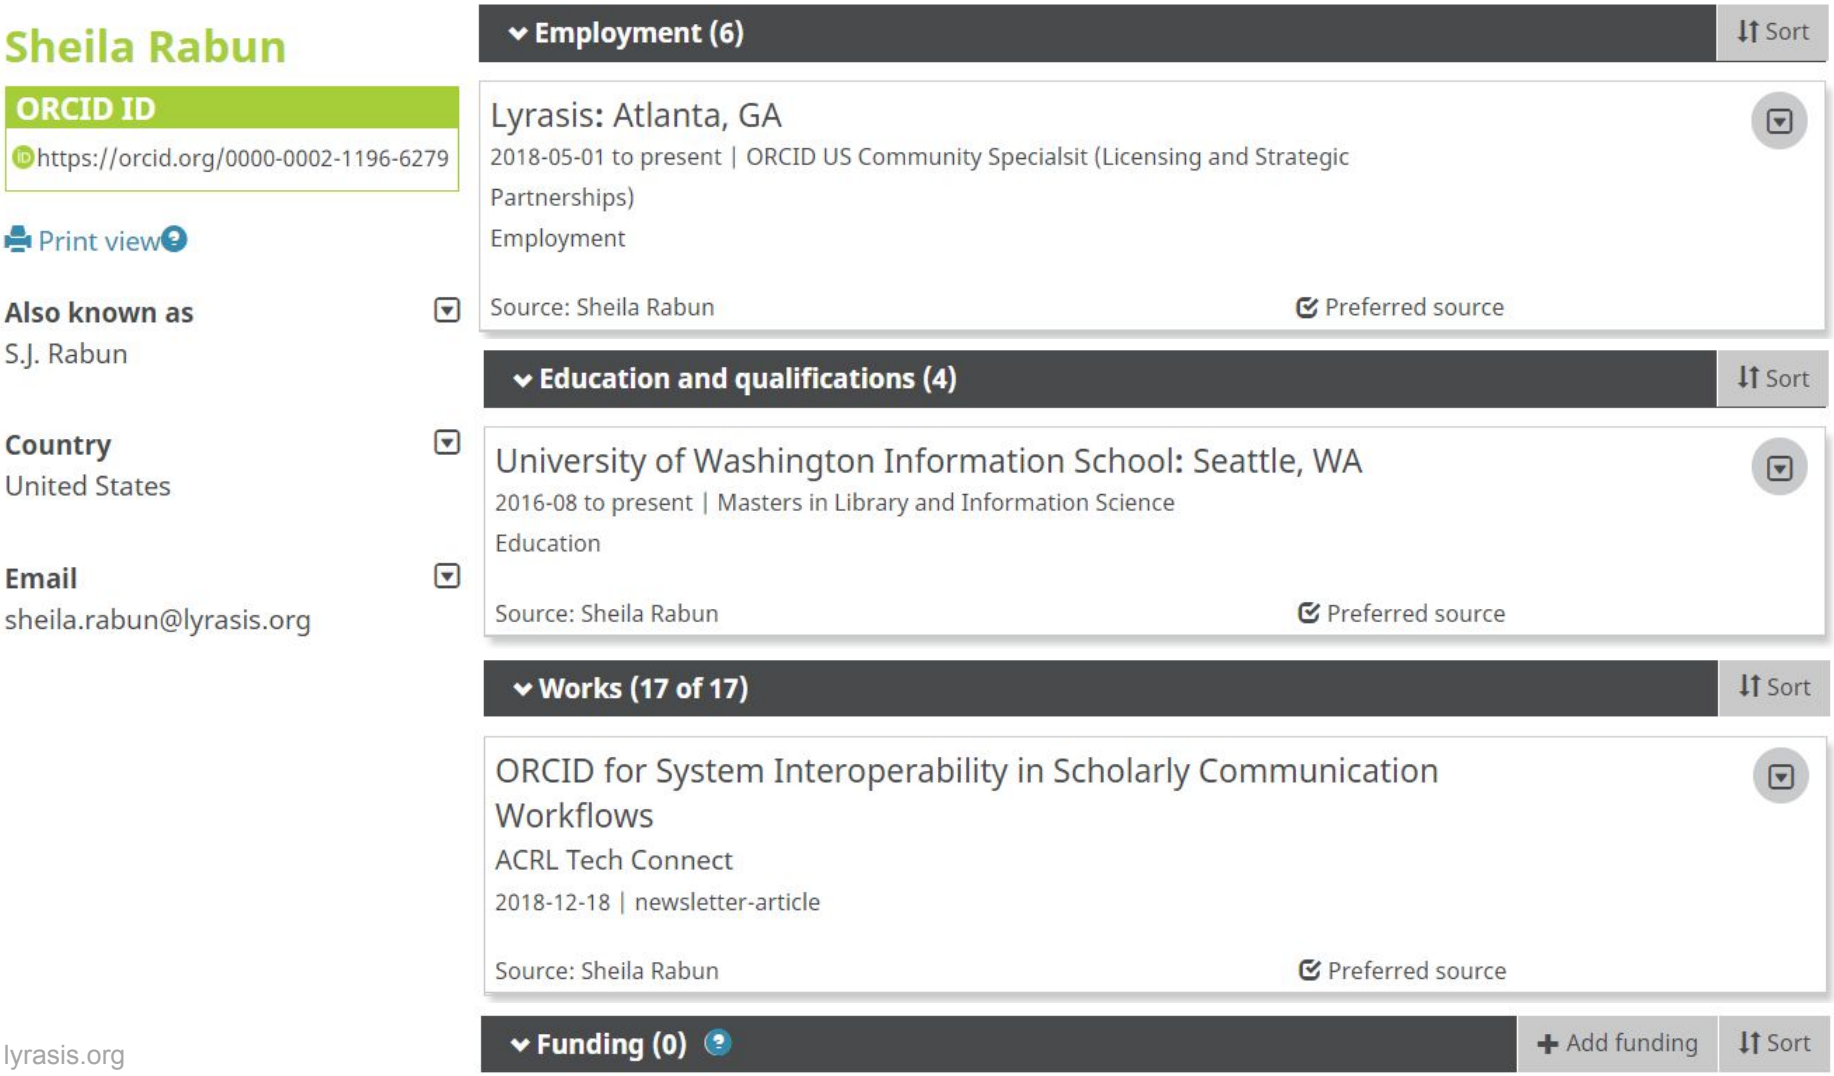
Agenda

- ORCID US Community Overview
- Global ORCID Overview
- Highlights from US research institutions:
  - University of Illinois at Urbana-Champaign
  - Florida State University
  - Mississippi State University
- Questions & Discussion

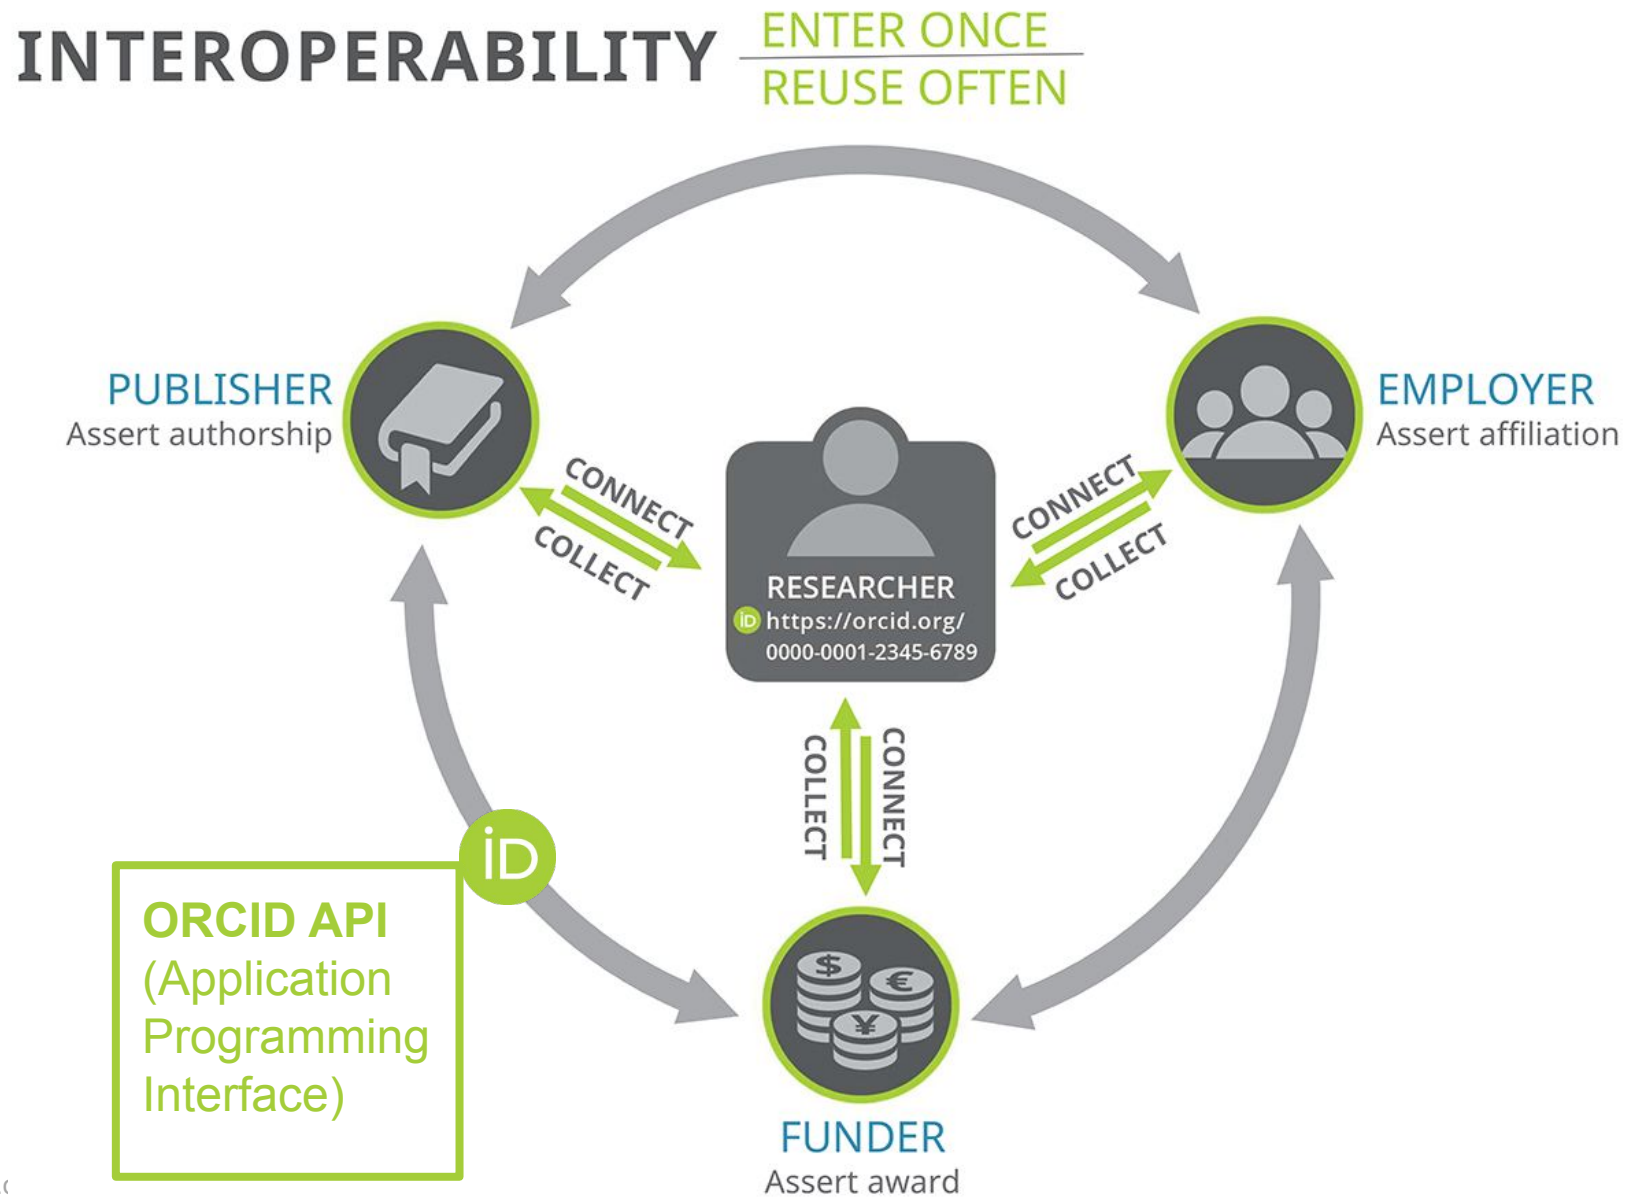
ORCID: Open Researcher & Contributor ID

LYRASIS

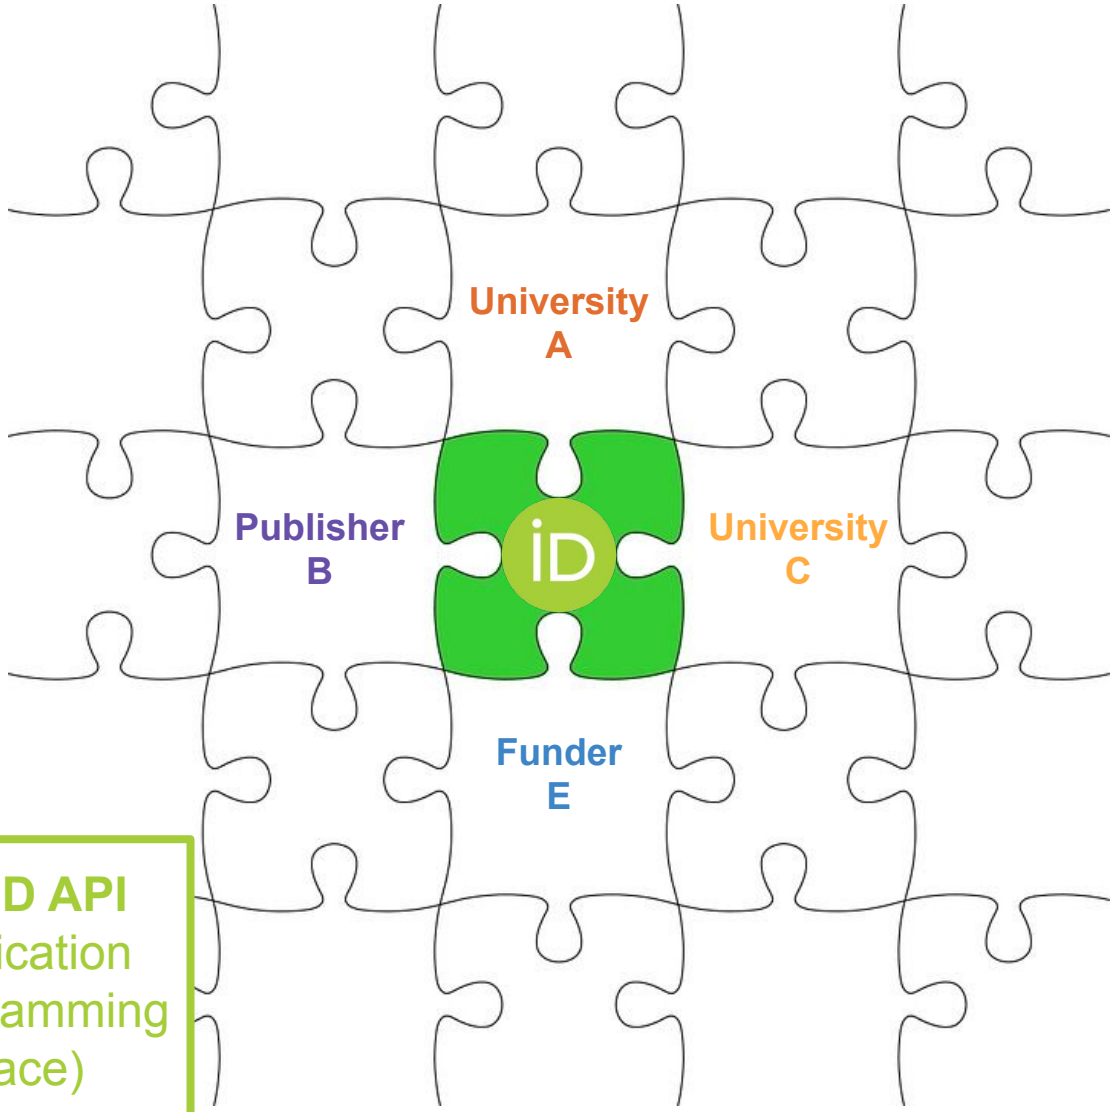
https://orcid.org/0000-0002-1196-6279



ORCID Ecosystem: Interoperability



ORCID API: Application Programming Interface



ORCID API
(Application Programming Interface)

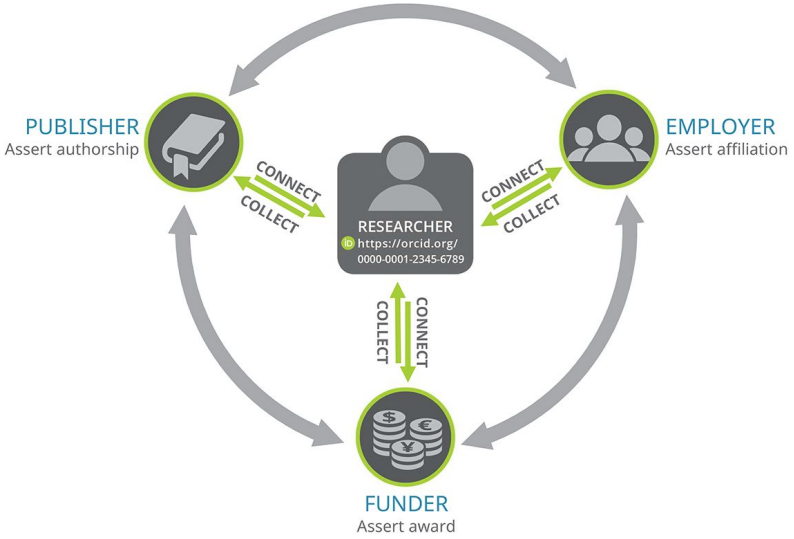
LYRASIS

Effective ORCID adoption requires 3 equally important components:

1. Stakeholder Support
2. Technical Integration
3. Outreach & Education



ORCID US Community

- Formed in January 2018
- National partnership for premium ORCID membership
- Any non-profit research institution can join as a member
- LYRASIS as lead

ORCID US Community

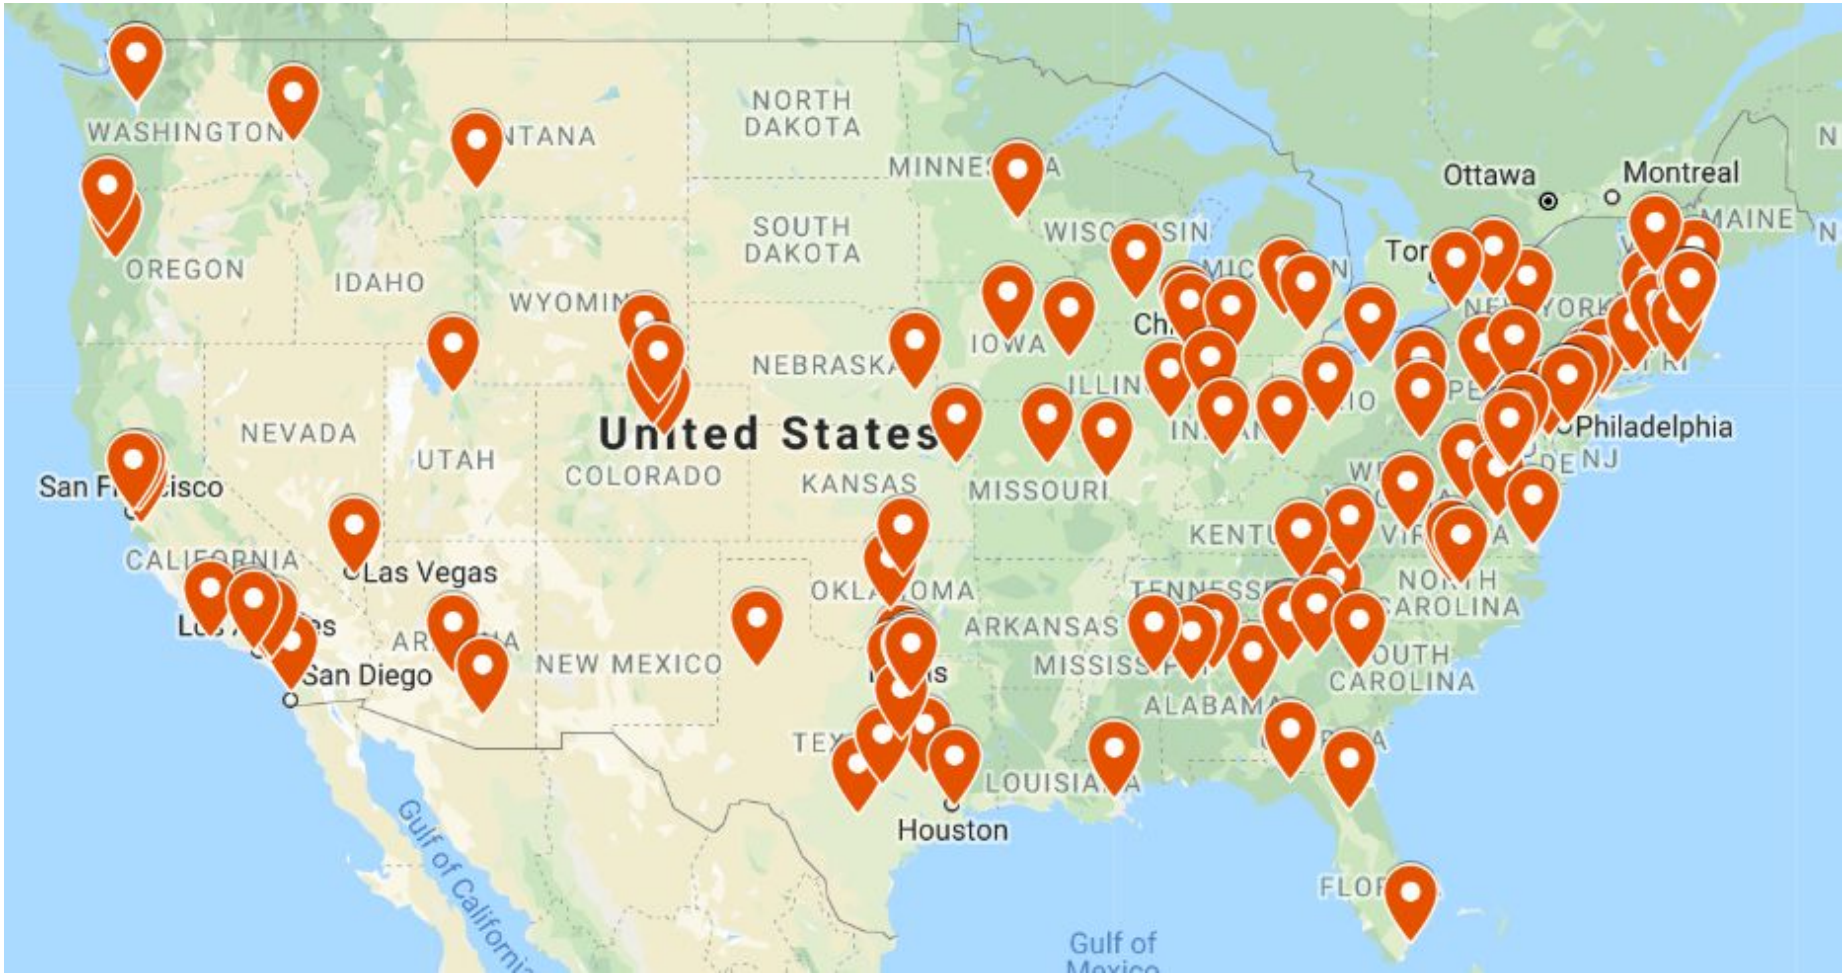
LYRASIS

ORCID
US Community

- Building a community of practice around ORCID in the US
- Substantially reduced fee for ORCID membership
- Dedicated resources, technical & community support

ORCID US Community

- 123 institutional members!



ORCID in the United States

ORCID Members
233

138 Research Institutions
31 Publishers
23 Associations
22 Other
16 Service & Technology Providers
3 Funders

Active ORCID System Integrations

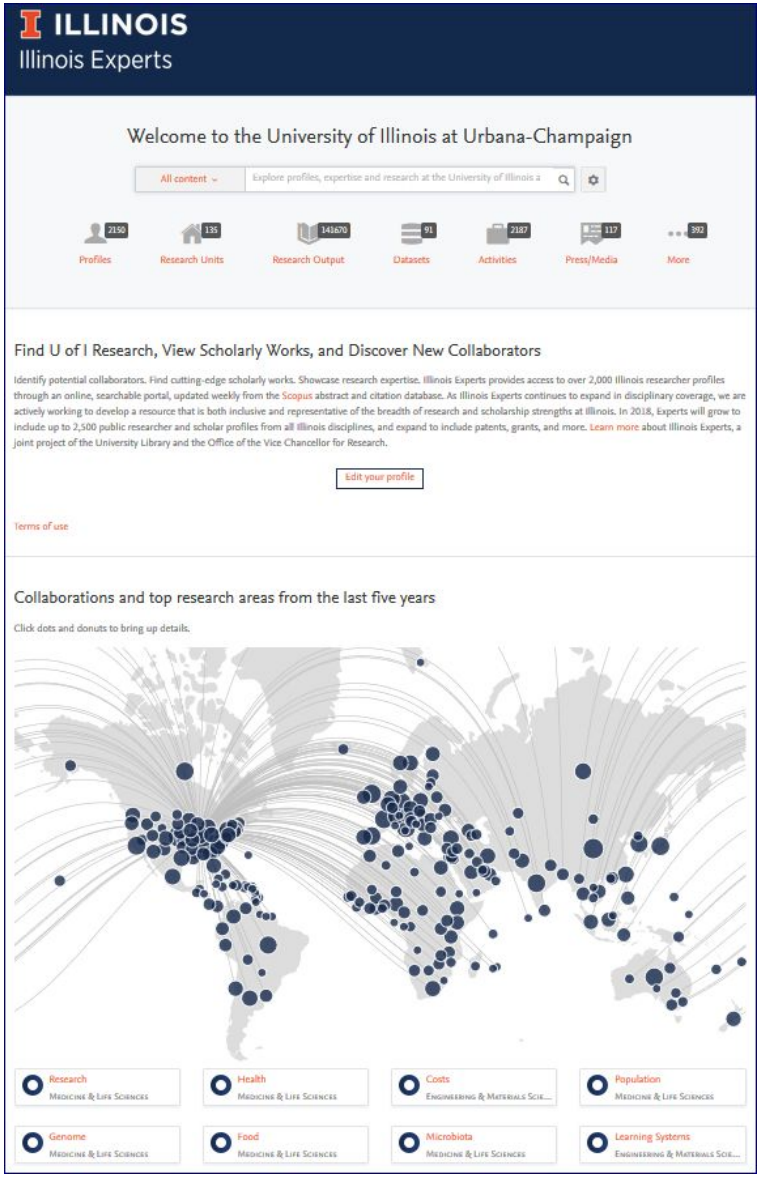
ORCID @ University of Illinois at Urbana-Champaign

Research at Illinois

- Ranked among top 5 universities for NSF-funded research
- $642M (FY2017) research expenditures
- 150+ centers, laboratories, & institutes
  - Beckman Institute
  - Institute for Genomic Biology
  - Prairie Research Institute
  - National Center for Supercomputing Applications
- 24M+ items in the University Library
- 2,000 tenure-track faculty
- 16,000 graduate students, 782 earned doctorates

ILLINOIS

© University of Illinois Board of Trustees



Elsevier Pure + ORCID

Pure: Vendor-hosted RIMS (Illinois Experts)

Emphases on facilitating discovery & showcasing research

Scopus connection provides weekly updates

Pure – ORCID integration timeline

- Feb 2016: Export to ORCID
- June 2017: ORCID create/connect
- Oct 2018: ORCID as import source

API access via BTAA/LYRASIS membership

Demo 1: Create an ORCID

Connect with your ORCID ID
You will now be directed to the ORCID site where you can generate your ORCID ID (if you don't already have one) and/or authorize the export of content (e.g. research outputs) from Pure to your ORCID record.
Upon setup, Pure will export the following content immediately, and then subsequently automatically update on a frequency determined by your Pure administrator:
Institutional organizational affiliation
Other personal identifiers (e.g. Scopus author ID, Researcher ID)
Your Pure portal URL
Your research outputs, where:
the publication state is either 'E-pub ahead of print' or 'Published'
the visibility of the record is 'Public – No restriction'
the workflow step is at least 'Entry in progress'

ORCID
ORCID is a nonprofit organization helping create a world in which all who participate in research, scholarship and innovation are uniquely identified and connected to their contributions and affiliations, across disciplines, borders, and time. Enabling ORCID as an online import source will allow the import of research output meta data available on ORCID's public API, for more information please see the Release notes.
Crossref
A system developed by publishers in 2000, to ease linking between references in fulltext documents in online scholarly literature, on the publishers' websites. Crossref uses DOI to transmit link information.
EBSCOhost Research Databases
EBSCOhost
EBSCOhost databases are the most-used, premium online information resources for tens of thousands of institutions worldwide, representing millions of end users.
MENDELEY
Mendeley
Mendeley is a free reference manager and academic social network that helps scientist organize their research, collaborate with others online, and discover the latest research. It holds more than 20 million records.
SSRN
SSRN
SSRN is a worldwide collaboration of over 352,400 authors and more than 2.2 million users that is devoted to the rapid worldwide dissemination of research.
Web of Science
Clarivate Analytics
Web of Science (lite)
Web of Science covers a wide range of databases, which together hold more than 40 million records. The subject areas are primarily within the scope of natural sciences, though social sciences and arts and humanities also are covered, in a lesser scale. IMPORTANT: The lite version of WOS contains only a limited number of fields and

Set Preferences

Use this page to manage settings which will alter the operation of the Faculty Expertise and Advancement System.

Change Default Name

You can change the default name used to pre-enter the author, presenter, performer, artist, and other like contributor fields for new entries in the CV Database. This name is also used to identify the faculty member among the list of contributors in the research summary report.

Change Default Publish CV Options

When you publish your CV, a copy of the CV will be posted to the public web site. You can select the format that will be used the next time that a CV is posted to the public site. In addition, the expertise keyword search in the public site will, by default, include expertise (language proficiency, areas of expertise, and international affiliations) from CVs, even those that are In-Progress. A function is provided to prevent your expertise from being indexed for this public keyword search.

Override Start and Review Dates

The Promotion and Tenure CV and the specialized faculty promotion CV footnote professional activities that occurred prior to your employment at FSU and prior to your last promotion review. By default, the hire date and review date are determined from the Professional Experience category from your CV. This function permits you to override these dates when generating a P&T or promotion CV.

Connect your ORCID iD

Register and connect your ORCID iD. This will establish a connection between your ORCID information and your FEAS information. This may be used to download ORCID "works" into the FEAS database as entries. You may optionally establish a trusted relationship between ORCID and FSU which may be used to download those ORCID works which are only accessible from trusted sources.

Connected (Trusted Access)

https://orcid.org/0000-0001-7213-521X

A trusted relationship exists. No further action is necessary.

Close

ORCID
Connecting Research and Researchers

ABOUT ORCID

WHY USE ORCID?

- **Save time & reduce administrative burden** by using automated data transfer through ORCID
- **Comply** with requirements for funding applications & reporting
- **Distinguish** between individual researchers who share the same name
- **Track, Manage, and Share data** across stakeholder systems & work-flows
- **Connect** with other research information systems, within & outside your institution
- Improve the **visibility** of your contributions
- Manage your **reputation** & **research impact**
- Ensure that you are accurately linked with your research, contributions, & affiliations, to **get credit for your work**

Planning on Publishing?

61 publishers require authors to have and ID from ORCID when submitting their work. A small smaple of these publishers include:

IOP Institute of Physics
SPRINGER NATURE
SAGE journals
PLOS
ROYAL SOCIETY OF CHEMISTRY
IEEE
APS AMERICAN PHYSICAL SOCIETY
Wiley Online Library

ORCID
Connecting Research and Researchers

FSU & ORCID

Claim Your ID & Get Started:

1. Register for an ORCID iD for free at http://orcid.org/register
2. Add information to your ORCID record and set visibility settings
3. Connect your ORCID iD with your institution and other organizations that you are affiliated with to authorize them as trusted parties
4. Use ORCID's "Search & Link Wizards" to search for and add your scholarly works to your ORCID record. You can also add works manually as needed.
5. Start using your ORCID iD in any profiles that you may have, email signatures, when applying for funding, submitting publications, reporting your research activities, and in any research setting to make sure that you get credit for your contributions and affiliations.

Connecting FEAS & ORCID:

1. Log in to FEAS+ at https://feas.fsu.edu
2. Click the "Import" button
3. Click the "Import ORCID" button
4. If you have not linked your ORCID account through your FEAS Preferences, click on "Register or Connect your ORCID iD"
5. Once your ORCID is linked, we encourage faculty to "Request a trusted relationship" with FSU
6. Next, click on "Import Works"
7. Once the import is complete, click "Accept Imports" or "Review Imports" to jump to the CV Builder

Learn More:

- Library Guide: http://guides.lib.fsu.edu/FSUORCID
- FEAS Importing ORCID Documentation: https://feas.fsu.edu/ReferenceMenu.aspx and click on "Importing and Exporting"
- ORCID: https://orcid.org
- Registration Video: https://vimeo.com/236776451
- Questions: Please direct general questions to Kelly Grove at kegrove@fsu.edu and for FEAS questions to Tiffany Phillips at fda-faculty-awards@fsu.edu

ORCID @ Mississippi State University

ORCID at MSU

- Getting the word out on campus by publicizing our institutional ORCiD membership
  - Workshops
  - Research Fairs
  - Campus mailer
  - Promotion by Office of Research
- Goal is to have only 1 entry point for faculty to enter their information - Digital Measures

DISTINGUISH YOURSELF

Register with ORCID for a unique identifier that distinguishes you from every other researcher and scholar and supports automated linkages among all your professional activities.

An ORCID iD (or ORCiD) is a unique 16-character identifier that's assigned to you when you register. Registration is free and your ORCiD is portable–it's not affiliated with any institution.

Use your ORCiD when submitting:

- a manuscript to a publisher,
- a grant proposal to a funder, or
- a dataset or publication to your institutional or another repository.

Populate your MSU Digital Measures account simply and efficiently by importing publication data from your ORCiD record. Whenever there's an opportunity to link your works and scholarly activities, your ORCID iD saves you time!

To learn more about how ORCID can help you claim your scholarship and save time, visit guides.library.msstate.edu/orcid or contact a library consultant via lib.msstate.edu/scholcomm.

THREE EASY STEPS

1

Register for an ORCID iD

2

Connect your iD to your work

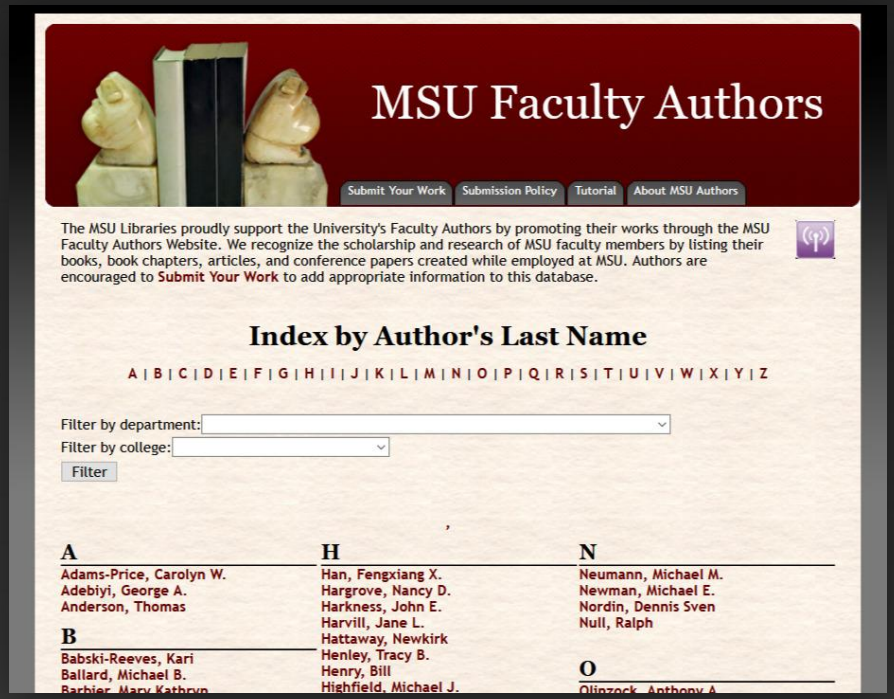
3

Use your iD in grants, publications, datasets and more

orcid.org

VIVO at the Libraries

- Originally planned as replacement for longstanding project MSU Authors
- Goals:
  - Incorporate data faculty enter in Digital Measures, info from ORCID, and existing info from departed/deceased faculty in MSU Authors
  - Use Digital Measures as single source of truth while promoting ORCID as a way to present that information to the world



VIVO at MSU

- Caught attention of Associate Vice President for Research Development Allen Parrish
- Dr. Parrish discovered similar projects in several other groups and convened us all into a working group:
    - Information Technology Services
    - Office of Public Affairs
    - Office of Institutional Research and Effectiveness
    - Office of Research and Economic Development
    - Various academic departments and research centers

Expectations

- **Standardize faculty info**
  - All faculty directories on the MSU domain will be replaced with a standard layout (which mirrors VIVO's default theme) which draws all info from Digital Measures (also integrated with ORCID)
  - Pilot: College of Business https://www.business.msstate.edu/directory
- **Reduce workloads**
  - Office of Public Affairs will be able to close their homegrown Faculty Experts site https://www.msstate.edu/directory/faculty-experts
  - Faculty will only need to enter any info about themselves or their research into Digital Measures to populate several different systems
- **Enable discovery**
  - MSU administrators and external entities will be able to get a quick and more complete picture of research activity at MSU
  - MSU researchers will be able to quickly and easily find collaborators in other departments and research centers across MSU

Successes

- **Dr. Parrish loves it!**
  - Admins very impressed by everything VIVO can do
  - Lends more importance to entering research data into Digital Measures
- **Librarians love it!**
  - VIVO and ORCID provide us with another way to assist MSU researchers in getting their work seen, funded, and archived
- **ORCID integrated into VIVO and Digital Measures!**
  - It is there, and it works...

Challenges

- **ORCID integration is not quite “complete” enough yet**
  - Digital Measures only ingests 1 or 2 types of material from ORCID
  - ORCID link in VIVO must be initiated (or delegated) by researcher…but we don’t want researchers to have to log in to VIVO
- **ORCID adoption isn’t widespread enough on campus yet**
  - We’re working on ways to market it to researchers, especially those just starting out
- **VIVO implementation proving difficult**
  - We only have 1 developer
  - We both have other projects
  - No previous RDF, XML, or SPARQL experience, so training is necessary before we can move forward
- **VPs considering a different solution**
  - They might purchase Academic Analytics, which effectively moots our VIVO work
