# ORCID FOR RESEARCHERS

# What is ORCID?

- ORCID is an open, non-profit organization run by and for the research community.
- ORCID provides researchers with a unique persistent **totally free** to use identifier, an ORCID iD, that connects them reliably and clearly with their research contributions, affiliations, funding, and facilities.
- An ORCID iD is NOT an author profile or an authority check
- ORCID provides open tools (ORCID iDs, Registry & APIs) that allow transparent connections between researchers and identifiers of their activities and contributions.

# Why ORCID?

To disambiguate names and uniquely identify

# Tackling Information Overload

ORCID is a non-profit organization, which provides a fully open and interoperable identifier to reliably connect researchers with their research contributions. The ORCID iD is a 16-digit identifier that researchers can register for and use for free.

**Connects individuals and their professional contributions across disciplines, organizations, and time**

**Enables recognition of all types of research contributions and innovation**

**Helps research institutions, funders, publishers, and other organizations better track and support research work**

# Enter once, reuse often

It is not a matter of “filling in” the ORCID iD but of optimizing the processes and avoiding manual entry.

Instructions

- ORCID provides a persistent digital identifier that distinguishes you from other researchers. Learn more at [orcid.org](http://orcid.org)
- To link your ORCID ID with the NRF you must 'Authorise' ORCID to allow this. This is an NRF prerequisite for applications/progress reports to proceed to review.
- PLEASE NOTE** this is a compulsory section in all applications/progress reports to the NRF for funding and rating.

Among others, there are open access databases (eg BASE, Redalyc) and proprietary (eg Scopus) and DOI registration agencies (eg Crossref, DataCite and Airiti)

Other identifiers (eg Scopus Author ID) and / or authority controls (eg GND, authority control of the German National Library) are recorded.

# Integrate in Dspace (KAUST solution)

## Expanded ORCID support for DSpace (Patch)

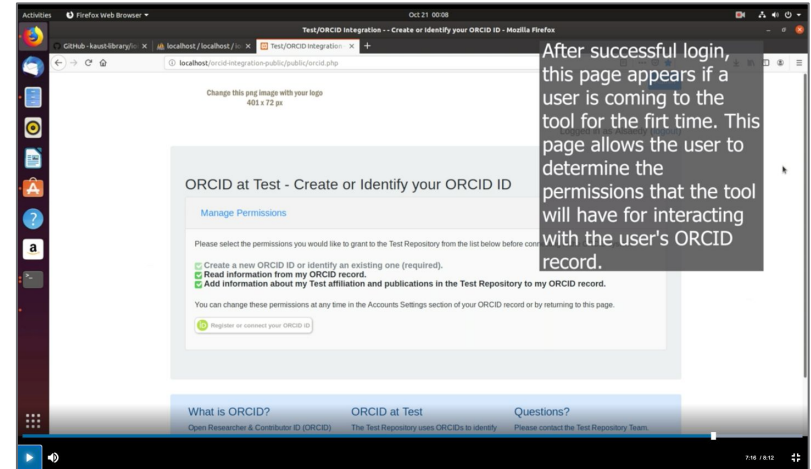

### Introduction

[ORCID](#) is a service that attaches a persistent digital identifier to a specific researcher by linking his/her name with a resolvable internet address, also called an ORCID ID. This ID allows for a clear distinction between different researchers and makes it possible for one researcher to link all of their publications to their ID in an easy and straightforward manner.

DSpace as a software can be integrated with the ORCID database. When such an ORCID integration has been set up, the authority key field is leveraged to link the author to his ORCID ID. This patch extends the features that become available in DSpace once an integration with the ORCID database has been done.

The DSpace expanded-ORCID-support patch has been funded and contributed to the DSpace community by [King Abdullah University of Science and Technology \(KAUST\)](#). It was designed for use in conjunction with the [Institutional ORCID Integration application](#) released by the KAUST Library.

The patch has been developed and is maintained by [Atmire](#), a registered service provider for DSpace.

## Institutional ORCID Integration (IOI)

Institutional ORCID Integration (IOI) provides a way for institutions to support the use of [ORCID](#) iDs by their researchers and students.

It is designed for use in conjunction with a [DSpace](#) repository (currently supporting [DSpace](#) versions 5 and 6). It expects the [DSpace expanded-ORCID-support patch](#) to already have been applied.

It interacts with ORCID using version 3.0 of the ORCID API. For full functionality ORCID membership and access to the ORCID member API are needed. It can also be used with the ORCID public API, but with limited functionality.
