

Integrating ORCID at LSBU

Stephen Grace

Deputy Head of LLR: Library
Systems and Content Delivery

The LSBU logo, featuring the text 'EST 1892' in a small, vertical font to the left of the large, bold letters 'LSBU'.

About LSBU

- LSBU established 1892 to “promote the industrial skill, general knowledge, health and well-being of young men and women”
- Our mission is to be recognised as an enterprising civic university that addresses real world challenges
- 17,125 students in 2018/19 (4,525 postgraduate)
- LSBU Group includes a further education college and two secondary schools

Manager

Haplo as our Repository-CRIS

- Had Symplectic as publications database since 2013
- New EPrints repository in 2015 to showcase research
 - Building a CRIS module by module, so migrated repository to same Haplo environment in summer 2019

LSBU Open Research

<https://openresearch.lsbu.ac.uk>

- Public facing repository of internationally recognised and world-leading research generated by our staff and students
- Publications, data, theses, practice research
- Searchable by researcher, subject, year, and Latest Additions
- Redesign coming soon

EST 1892 **LSBU**

A standards-based repository

- Repositories are part of a wider infrastructure – connecting with external services like ORCID and Datacite, as well as with internal systems for research administration and public websites of the university
 - Following standards saves time and effort
 - Proper integrations between systems are sustainable
 - I have an interest in Persistent Identifiers and in repository developments (such as Unlocking Thesis Data project which recommended ORCID and DOI identifiers <https://doi.org/10.15123/PROJECT.15>)
- 

ORCID at LSBU

“All LSBU researchers are required to have an ORCID identifier, which will allow better linking of outputs and their creators. LSBU will provide a service to simplify account creation as part of its ORCID institutional membership.”

[Open Access Policy](#)

We had connected Symplectic to ORCID, but not the EPrints repository. Haplo integration was in line with Task Force recommendations

ORCID in Repositories Task Force recommendations 2019

- 8 recommendations at <https://doi.org/10.23640/07243.7777274.v3> including
- 1. Support collecting authenticated ORCID iDs, which means that users sign into their ORCID accounts and authorize the repository to obtain their ORCID iD and (optionally) permission to update their ORCID records
- 2. Support other ways of obtaining ORCID iDs, including in mediated deposits and bulk uploads by repository managers, as well as automated deposits from other systems

A large orange circle is positioned on the left side of the slide, partially cut off by the edge.

... a work in
progress

- 3. Allow administrators to request authenticated ORCID iDs and ORCID record update permission from authors and co-authors, in cases where iDs are missing or have not been authenticated
 - 4. Support displaying ORCID iDs wherever user/contributor information is displayed. ORCID iDs that have not been authenticated by their owner should be displayed slightly differently from those that have been authenticated
 - 5. Support pulling and pushing information to and from ORCID
- 
- A series of four yellow curved dashes are located in the bottom right corner of the slide.

Advocacy for ORCID

- We've never had a concerted ORCID push!
- A prominent invitation to connect an ORCID ID in Symplectic and in Haplo
- Request ORCID in AURA (our annual research audit)
- Promote ORCID at inductions for academics and research students

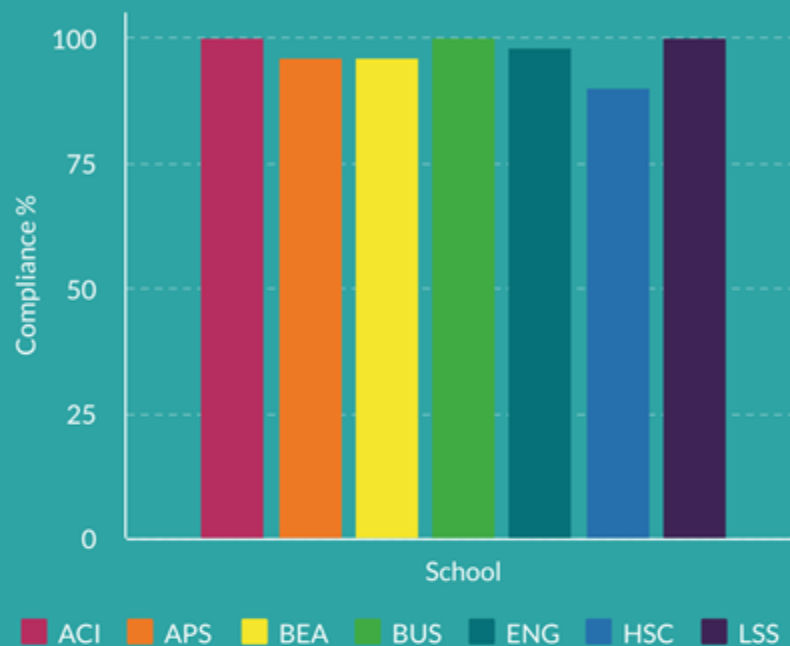

Last Month's Activity

Total outputs by type

OA Compliance League Table October 2019 - September 2020

ENG: 98%

38 ORCID IDs

One to one appointments are available on Teams

Competition

We've started to add counts of ORCID IDs connected in Haplo to our monthly Open Access compliance reports

League table approach saw improvements to compliance – perhaps ORCID is next!

Jisc Publications Router

- **“Publications Router** captures content such as research articles from publishers and other providers and delivers it straight into the repositories of institutions to which the authors are affiliated. The resulting notifications consist of rich, authoritative metadata and often the full text of the articles themselves.”

Note for UK only

Tasks

Institution name	School of Health and Social Care, London South Bank University, London, United Kingdom

Summary

We needed to integrate ORCID with our new Haplo repository platform

We had an interest in standards and in PIDs

Low key advocacy, but ORCID uptake is improving

We look forward to full ORCID Sync

Thank you
