Pourquoi utiliser les identifiants uniques pour les chercheurs

Quelle est la particularité d'un nom?

La plupart des noms ne sont pas uniques

Beaucoup de personnes ont le même nom

Les noms peuvent changer suite à un mariage ou suite à d'autres circonstances

Les personnes utilisent différentes versions de leur nom au cours de leur carrière

Les individus utilisent différents alphabets, abréviations ou conventions de dénomination

PIDs pour les personnes, les lieux et les choses dans la communauté de la recherche

Les PIDs pour les personnes (chercheurs) comprennent ISNIs et ORCID iDs

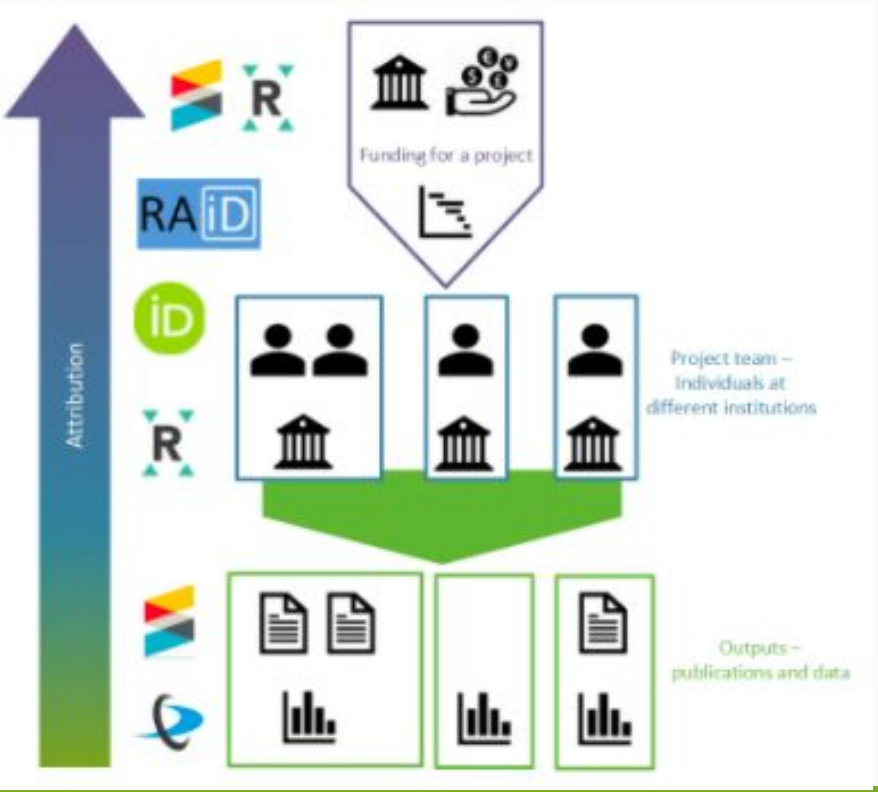

Le PIDs pour les lieux (organismes de recherche) comprennent GRID et ROR

Les PIDs pour les choses (produits de la recherche, subventions, activités de révision, preprints, projets, etc.) comprennent DOIs de Crossref et DataCite, IGSNs, RAiDs, et plus

Identifiants pérennes (PIDs)

Data should be **Findable**	F1. (meta)data are assigned a globally unique and persistent identifier (DOI) F2. data are described with rich metadata F3. metadata clearly and explicitly include the identifier of the data it describes F4. (meta)data are registered or indexed in a searchable resource
Data should be **Accessible**	A1. (meta)data are retrievable by their identifier using a standardized communications protocol A1.1 the protocol is open, free, and universally implementable A1.2 the protocol allows for an authentication and authorization procedure, where necessary A2. metadata are accessible, even when the data are no longer available
Data should be **Interoperable**	I1. (meta)data use a formal, accessible, shared, and broadly applicable language for knowledge representation. I2. (meta)data use vocabularies that follow FAIR principles I3. (meta)data include qualified references to other (meta)data
Data should be **Reusable**	R1. meta(data) are richly described with a plurality of accurate and relevant attributes R1.1. (meta)data are released with a clear and accessible data usage license R1.2. (meta)data are associated with detailed provenance R1.3. (meta)data meet domain-relevant community standards

Qu'est-ce qu' ORCID?

ORCID est une organisation à but non lucratif qui fournit un identifiant ouvert et interopérable permettant de connecter de manière fiable les chercheurs à leurs contributions à la recherche. ORCID iD est un identifiant à 16 chiffres que les chercheurs peuvent acquérir et utiliser gratuitement.

Établit le lien entre les individus et leurs contributions professionnelles à travers les disciplines, les organisations et le temps

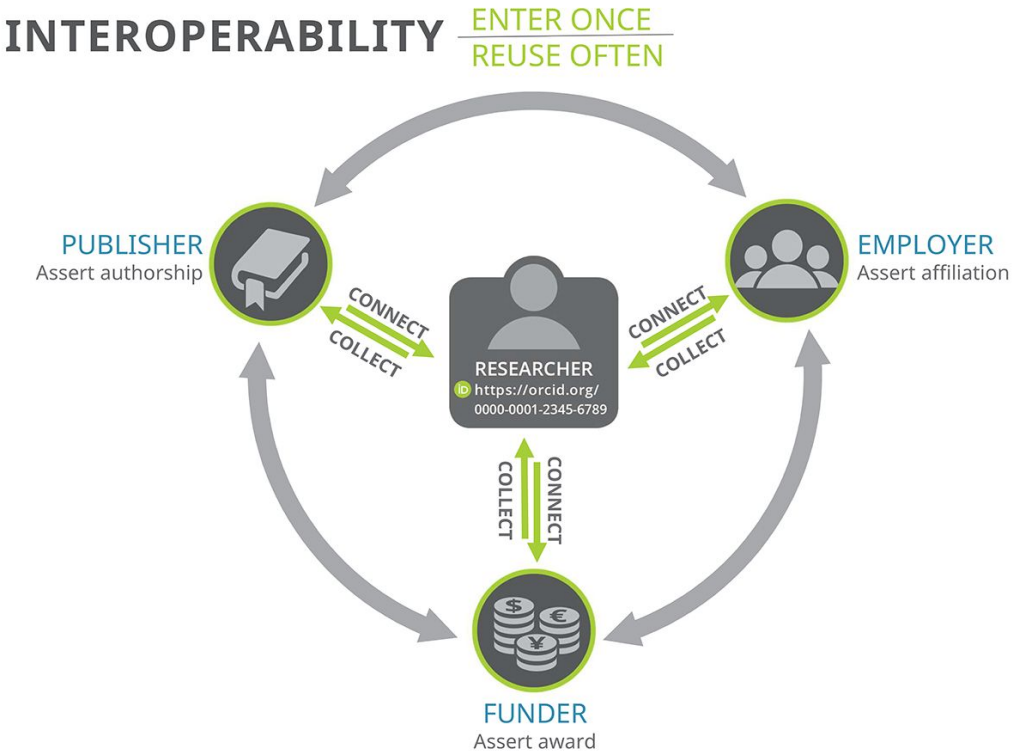

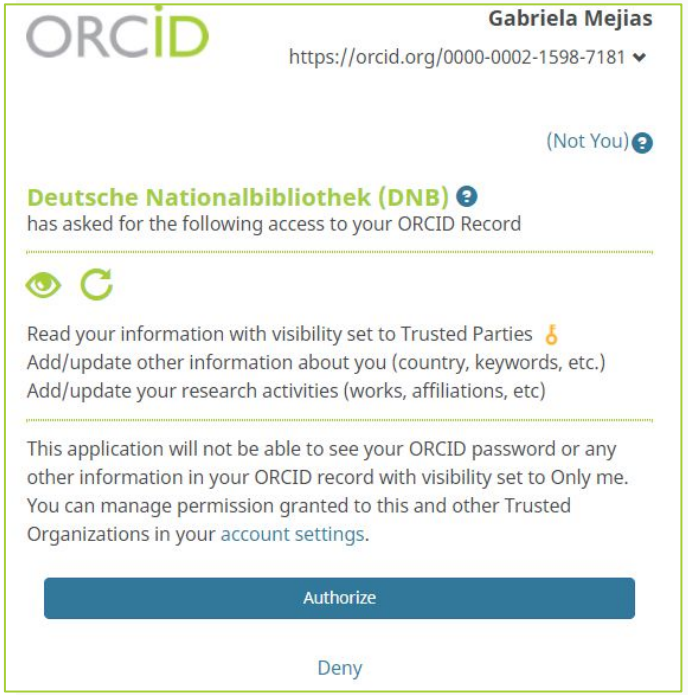

Permet la reconnaissance de tous genres de contributions à la recherche et l'innovation

Aide les institutions de recherche, les bailleurs de fonds, les éditeurs et les autres organisations à mieux suivre et mieux soutenir les travaux de recherche

ORCID en France et en Europe

Coalition S, Plan S principles and implementation

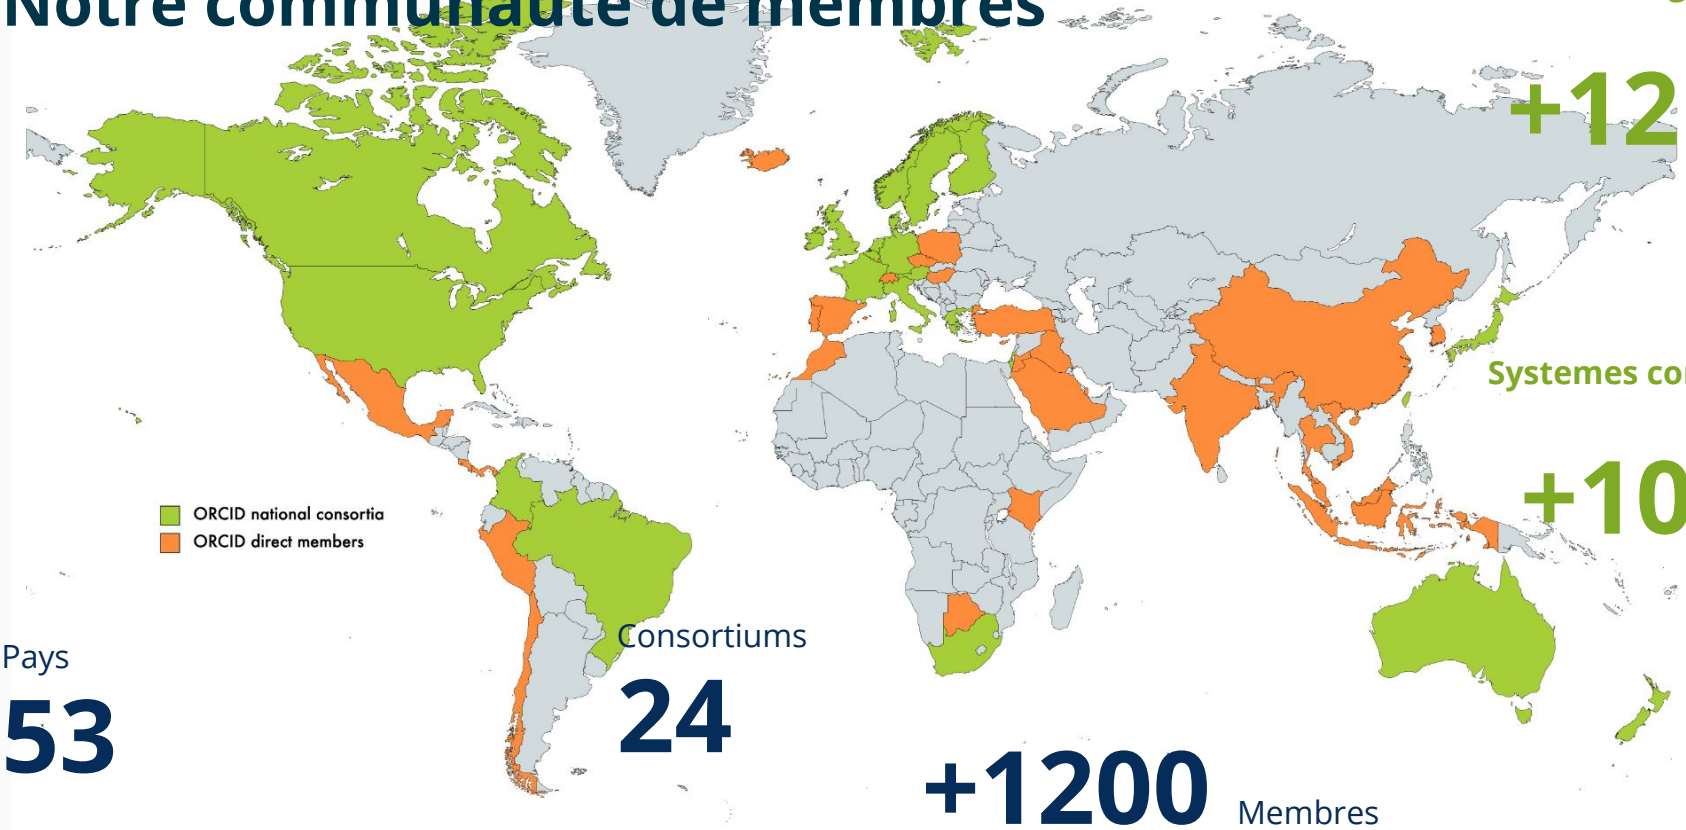

RECOMMENDATION #8:
The European research system and Open Science Cloud should adopt ORCID as its preferred system of unique identifiers, and an ORCID iD should be mandatory for all applicants and participants in FP9. Unique identifiers for individuals and research works will gradually improve the robustness of metrics and reduce administrative burden. ORCID provides researchers with a unique ID and associates this ID with a regularly updated list of publications. It is already backed by a growing number of funders across Europe (http://about.orcid.org/). The EC and ERC should utilise ORCID IDs for grant applications, management and reporting platforms, and the benefits of ORCID need to be better communicated to researchers and other stakeholders (Galsworthy & McKee, 2013).

European Commission, Directorate General for Research and Innovation. (2017). Next Generation Metrics: Responsible Metrics and evaluation for open science.

Que pouvez-vous faire?

- Enregistrez votre iD et connectez vos informations (HAL, ISNI, BASE, Publons)
- Activer l'auto mise à jour avec Crossref, Datacite, Publons
- Utilisez des référentiels ouverts pour obtenir des identifiants pour vos articles et production scientifique (HAL, Zenodo)
- Partagez votre iD (signature, site web, etc.)
- Rejoignez le PIDForum
- Consultez le site web du consortium #ORCIDFrance

Merci de votre attention!
